

Description: TABLETOP PLATE MOUNTER

Product: CONVERSOURCE VersaMount 24

Accurate plate mounting is critical to any print operation. The Conversource VersaMount 24 is an affordable, accurate and easy-to-use mechanical plate mounter for the narrow-web pressroom.

The VersaMount 24 can accommodate a wide range of printing cylinder widths with repeat lengths up to 24". The printing cylinder is securely positioned between two tapered centers, accepting a wide range of printing cylinder inside diameters without the need for adapters. A pivoting straight edge aids in drawing guide lines and cutting mounting tape.

With the VersaMount 24, you'd reconfigure the mounter to also work with the wider printing cylinders. No additional investment would be required.

A unique feature is the multi-position right sideframe. The base plate provides four locations for the positioning of the right sideframe. In about 10 minutes, the VersaMount 24 can be reconfigured to accommodate different ranges of printing cylinder widths.

Technical Details

Max cyl. repeat 24"
 Dimensions 33.75" x 6" x 11"
 Construction Steel

In the past, tabletop plate mounters were width specific. If you bought a 10" press, you bought a 10" mounter. When you bought a new, wider press, you bought another plate mounter.

Printing Cylinder Widths		
Position	Minimum	Maximum
1	4.75"	13.75"
2	8.50"	17.50"
3	11.50"	20.50"
4	16.50"	25.50"
